Hello,

The following submission has been created.

Track Name: IntCST2026

Paper ID: 376

Paper Title: Monitoring Deployed Machine Learning Models: Identifying Hidden Performance Degradation

Abstract:

Machine learning (ML) models deployed in production environments are susceptible to gradual performance degradation due to evolving data distributions and changing operational conditions. Such degradation often remains undetected until significant performance loss occurs. This study presents a structured analytical framework for monitoring deployed ML systems and detecting hidden performance decay. We review and comparatively analyse modern monitoring platforms, including open-source and enterprise solutions, based on their drift detection techniques, alert mechanisms, scalability, and governance features. The research synthesises recent academic findings on data drift and concept drift detection, and evaluates how these principles are implemented in contemporary MLOps tools. Rather than focusing solely on accuracy metrics, this work emphasises statistical drift indicators, performance estimation without ground truth, and explainability-driven monitoring. The findings highlight practical trade-offs between detection speed, alert precision, and operational complexity. The study concludes with recommendations for selecting monitoring strategies aligned with organisational scale and risk tolerance.

Keywords: Machine Learning Monitoring, Data Drift, Concept Drift, Model Degradation, MLOps, Drift Detection, Evidently AI, WhyLabs, SageMaker Model Monitor, Fiddler AI.

Submission Questions Response:

1. Conflict of interest
Agreement accepted
2. Status of using third-party material in your article.
I am not using third-party material for which formal permission is required.
3. Certificate of originality
Agreement accepted
4. Corresponding Author's Contact number
918199065723
5. Country Name
INDIA
6. Authors Contributions
TEJANSHU SETHI Responsible for literature review, data collection, methodology design, analysis, implementation, and preparation of the complete research paper
7. Conference Rules and Guidelines

Agreement accepted

Thanks,
CMT team.
